OBJECT VALENCY

Ahmadjanov Ilhomjon
FarDU teacher

Key words: object, valence, klasema, sema, subject

Abstract

This in the article valence from arguments one object valency about thoughts statement done and linguistically evidence based on commented.

Speaker his own his opinion statement reach in the process beauty, beauty such as to the circumstances attention will give. Interlocutor for beautiful to speak strives. In this thrift communication in the process of conversation more hot to go provides. Speech directly sentences through is formed. In the matter only of the predicate himself to bring through judgment expression, opinion to the interlocutor deliver can. But in the sentence form in terms of did not materialize but in substance felt standing actants there is will be Object, subject actants the idea in expression the most necessary part is counted. Above telling as we passed, this is arguments remain unrealized. can. Current day linguistics in the field of the predicate alone talk organize is enough said to look wide spread. True, predicate the rest all actants to himself combine, subjugate opportunity has, however in the predicate sentence, message such as factors which one object on done increases. That's why for object actanti is an obligatory, necessary argument of valency.

Object valency of the verb lexical-semantic of valences one and is the main one. He is almost verb predicate in semantics lies [1]_ Action as an object own on top of it received.. or that's it movement in the process appear has been or appear happening is the subject [2]. For example:

Unfortunately, I'm not even a judge, so
you I can't do it almost from pains.
Maybe I really sympathize with you, a true friend cake,
They are I need it too true.

This is it in the passage second I'm not good at verse compound predicate on duty came. Predicate function him management opportunity expands and differently actants realization enable gives birth Making halos of the compound in semema to get rid of something, to save or someone from this free reach such as like words with joining and them realization opportunity there is. From pains verbatim of the predicate movement as a result appear it has been and object actanti being came. Getting rid of pain in lexemes symbols each other requirement reached and object actanti that the predicate is an obligatory argument their my class order that he found basis be takes.

GANArimova own candidacy in his dissertation object valency of the subject movement as a result surface understand that it has arrived it is necessary, - he says [3]. This situation the following in verses seeing let's go:

Mavridi if he doesn't come don't run bedovni,
answer if you know, don't give request.
On the Danube by default better no.

Word to say forced don't do someone.

First in verse don't run verb predicate on duty came. In the predicate never how cut forms there is it's not. So although - from the predicate subject meaning felt is standing Har how grammar from the forms case has been verbs predicate on duty when it comes command like second identity meaning stands. Logically subject actantin recovery can. Bedovni verbatim mother that's it restored of the subject movement as a result surface came. Or second in verse don't give Don't print the lexeme either lexeme with one different on duty is coming It is also a subject not expressed, but logically him restore get and of the object surface brought let's see can. These cases, ie predicate, subject, object of words appearance very many occurs. To this conditional respectively talk organize doer S – Ob – W form as parts mold as get can. That 's right from the predicate another parts participation can't possible, however they are on the right felt stands. Judgment what about going away understood stands. Judgment something object, sometimes to the subject relatively surface is brought. Judgment objectless surface coming possible it's not. For example:

I recognized my country, old glue.
Alisher spoke leech my tongue
And but my dear blocking my way
What a shame days saw my youth

to know lexeme talk organize is making In this he is a plant forms tense, person -number suffixes with formed. to know lexeme by itself talk cannot organize.. In this process which one thing acquaintance about sentence, message will give. If this lexeme himself talk organize is doing let's say wrong will be I read the word if we hear to our minds book, letter, writing such as revenue agreement with formed word forms is embodied. to know as well as in the lexeme that's it condition happened will give. That is my country, old glue, *Alisher spoke leech my tongue* such as forms with being filled, that's it forms to know of the lexeme in semema come true that it is coming out to see can.

Object actanti of valence lexical-semantic type entrance above it was said. This is an actant in itself one series let's go forms with application can. Basically, income agreement this of the argument structural part is counted and verb in the series of the word transient verb being to come provides.

Transitive verbs object to valence have to be his object expressive to the sky have to be, that is that's it verb objective verb that A. Hajiyev emphasizing passes [4]. Transitive verbs own in the semester object denotative to the sky according to him classman content find receiver sema has been the actant Demand does [5]_ For example:

Shower came who friend don't know, poet,
Pand after eating your heart after tilma, poet.
On behalf of you bigger your name maybe not
Circles to the net aspiration, poet.

Second in verse tilma lexeme physical movement is a verb. It is income agreement in itself reflection made lexeme with combined for transient verb is counted. to wish lexeme in semema something cutting sema there is. Cutting things in subjects happened will give. In this verse cut off

[4] A. Hajiyev . Verb . - Tashkent: Science, 1973, p. 83

[5] M. Mirtojiyev . Uzbek in the language verb valences . T - 2007. University . Page 18

generous lexeme Demand is doing and this two lexeme se melarin class because of its harmony content found.

Summary in place these to say maybe an object actanti action to himself acceptance by doing receiver is an actant. His realization a must even if it 's not content place felt stands. Object argument revenue agreement with when formed himself connecting the verb transient to the rotate feature have that seeing we passed Himself connecting of the verb constant respectively in semema to live above in examples statement done.
