Abstract

This article describes the study of valence in Uzbek linguistics and its features in the language.

It is known that the matter is different judgment, process expression is enough Judgment while two member's - subject and predicate parts mutually from the relationship organize finds [1]. To the predicate two different to look there is :

1) Predicate have and of the section mutually attitude ;
2) Speak up to existence relationship.

Next to look in the language participle the center of the sentence to take over take came. Subject of the predicate argument for empty place filler actants as marked.

Usually, the subject individuals expression doer in lexemes surface comes out In the lyrics live and lifeless subjects sometimes subject task can also do it. That's it according to subject person and person didn't happen to species is divided[2]. Example: *Grandson when he grows up how happiness erur.*

Tomorrow from your day so cheer up full.
Generations like a beacon scattered if it stands light.
To this equal to happiness land on the face no .

This is it in the passage the first and the third in verse subject person with (*Nabirang if he grows up, Generations light scattered if*) is expressed. Second in a sentence while subject presmet expressive lexeme... through expressed. Or: *To your garden I planted four bush purple ,*

Time past, navqiran it has been sprouts .
Dersiz : - Why? you will be surprised
In your Tegra many -ku poplars, willows .

It's poetic two in the passage in the sentence *sprouts* lexeme of the predicate subject actantin realized .

Equal no is wealth friend, comrade ,..
Love, love is also soul not a word

Above to verses attention let's look . *A friend is a friend, a comrade* lexemes of the predicate subject actantin come true released.

Subject person sema meant without, of the predicate different in actants manifestation will be:

1. Agent actanti. This argument is a person sema that is, move executor represents. Agent actantin managed coming word clearly ratio in the form of will be and this argument is in the

[1] Abdullayeva Dilfuza Talibovna . Content subject and his Uzbek in the language expression . 2001, page T-5

[2] That's it work , page 6

sentence have on duty will come. Agent of valence substantive, form in types manifestation to be can.

Nineties. black the rest
An old woman tourists in this little it's not .
One the tower photo received.
One to the fire put passion.

Few of the lexeme in semema some kind of thing or of the person from the norm scarcity theme is also available and this don't see place ***tourists*** lexemes through manifestation being the first in the sentence of the predicate empty place filled, agent on duty came. This is a lexeme predicate with never how grammar forms and content connected for semantic valence type belongs to will be

Someone's per head the work fell suddenly.
Satan did he find it - he didn't find it my flour
Your children collect he smoked..
I don't forgive myself, he said myself.

Semantic valence in type lexemes mutually sema based on each other realize each other requirement is enough Above given in the example ***myself*** lexeme of the predicate agent actanti place filled in and perdicate with ***- no*** person -number form through connected . That's why for this condition grammar form to valence is about

2. Addressee actanti . This argument is the agent actanti like subject the meaning means. But meaning and verb with grammar to be connected according to difference does.[3] Agent of action executor addressee if identified actanti action acceptance by doing recipient represents. From this except addressee actanti of valence semantic type surface if it comes out, agens actanti makes sense and form of valence in the composition will be But addressee in the actant departure agreement and different helpers with coming grammar to valence like goes. Actually, the predicate in the sky of the subject to someone being called manifestation being stands.

Calculation do it they are each yes
Uzbek usually did not know
Old lady did not hear nine dishes
The old man also to his son-in-law sarpo did not

This is it poetic in the passage subject on duty ***Old man, old woman, son-in-law*** lexemes came. ***Old man, old woman*** lexemes agent actantin manifestation reached if so, ***groom*** lexeme addressee actanti on duty came. Addressee on duty in the lexeme above as noted action acceptance by doing receiver person and name, evaz meanings felt stands. Or:

The world to work feed surprised lol..
Apprentice to his teacher gave question :

Including to his teacher shape agreement shape action due to receipt directly student by known one to the address directed to see can.

3. Patience actanti. In the matter differently actants realization opportunity have will be Everyone actants are also constant respectively in the sentence cannot be realized. Above talk main unit predicate that look leave we passed In the matter form in terms of object, subject actants unrealizable possible, but logically this seats felt stands. Here it is so of actants one calculated

[3] M. Mirtojiyev . Uzbek in the language verb valences . T - 2007. University . Page 22

object argument sometimes person to the sky have has been word with can also be expressed. The object expression reached person like lexemes patience is called For example:

Tall don't have under
They brought convict .
Executioner hide solay that.
Touched my throat

In the passage person like from lexemes convicted lexeme is also available . In the matter revenue agreement shape each how the word object being to come provides. Convicted lexeme is also from the predicate understood of action object being came.

Patience actantin that realizes from tools one do not increase ratio is the form Do not increase ratio shape movement fell person or subject realizes . Above in the sentence - tir shape convicted lexeme manifestation did. That's it account received without patience actantin garmatic if we call it valence wrong it won't be.

4. Counterparty actanti. Of the verb togetherness ratio addition counterparty actantin surface releases. A counterargument is in the sentence almost ***with*** assistant with is used . If it is action executor person the number the plural organize reach, predicate togetherness in proportion though , with assistant participation did not if so, he is a counterparty actanti is not considered In that case agent quantity will only increase.

Summary by doing these to say possible, of the predicate himself form by talk organize though, but meaningfully, logically subject, object actions are also felt stands. These are actants to the predicate subordinate that it was for talk necessary elements it's not is called However without these talk organize reached it won't be.

Also the subject different different appearances there is in being lexeme semantics and some forms basis to be above in examples seeing passed.
